- ◆ Rails installed and aligned

No weather delays -- The weather doesn't matter, because our factory process keeps everything inside, on time, and delivered when promised.

About Phoenix Modular Elevator

PME produces high-quality, commercial modular elevators and hoistways. The elevators are typically comprised of a steel hoistway with the elevator car and components installed inside and completely pre-wired. This makes our elevators and hoistways the fastest and easiest to install.

The units are found across the United States and Canada and used in schools, universities, hotels, stadiums, amusement parks, office buildings, government buildings, and churches. Phoenix Modular Elevator has been constructing modular elevators since 1995.
